GREAT IMPROVEMENT IN DENTISTRY.

The attention of the public is called to a great discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER

MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting under the plate while eating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hitherto used.

I have secured Letters Patent for the United States, England and France.

The improvement is not in material, but in the construction, which cures the atmospheric pressure on the entire plate.

I have sold the exclusive of said improvement to Dr. L. Gilman, to wit, the Counties of Franklin, Washington, Chittenden, Lamoille and Grand Isle. Those wishing to avail themselves of such improvement, will call on

FLOUR.

I AM in receipt of 200 to 300 bbls. of FLOUR per week, and my facilities are such that I can supply the trade on as

as any other party or parties (as my flour pays no tribute to middle men, nor 2½c. per barrel to drummers), with Superfine and Extra Flour, made from Milwaukee Club Wheat, by ear-load or single barrel.

WINTER WHEAT FLOURS,

from good to very choice, in full supply.

Corn for sale at all times. Cash paid for Wool and Sheep Pelts.

I take this opportunity to return my most hearty thanks for the very liberal patronage I have received since I commenced business, and hope for a continuance of the same.
